Friday, 29th Sep 2023.

Welcome to the Seventh Edition of the ZPPSS Newsletter for the Academic Year 2022/23.

The Principal's Desk:

A perspective of the 2023 School Session and the Third Term

Casting our eyes back we remember how the 2022/23 session started. Our school was programmed to achieve and implement policies, tasks and accomplish the impartation of knowledge to our students. Examinations lay ahead of us, both school based and international. Here presently, we stand as testimony that what was set to be accomplished has fully been done. Our chief aim as an international school is teaching and success in examinations and on this, the management and staff has raised the status of the school to IGCSE level. This translates that your beloved children can grow up with Zomba Private Primary and Secondary School right from the Foundation Class to the highest class of the IGCSE. This by itself speaks. It speaks of the excellence of the school from the highest to the lowest office bearer. It speaks of the excellent efforts of the school management, the administration, the teaching and non-teaching staff and the ever hardworking students. This does not exclude you parents. But apart from this we have borne the parental role on our students and by each passing day we have taught discipline, coexistence and racial equality in your child. We have prepared your child towards the reality of life. We lit a flame of ambition to succeed in his or her present life and future. We will continue to be the best school for your child.

Receive our wishes for the vacation season.

Regards,
Mr. Raj
Principal

*"Education is not the learning of facts,
but the training of the mind to think."*

-- Albert Einstein

EXCELLENCE IN OUR SCHOOL BASED EXAMINATIONS

Coaching and preparing our students for both Checkpoint and IGCSE Examinations is a continuous process and a chain of responsibility which trickles from the Foundation, Lower Primary and Upper Primary Classes. Our students have been performing very well and in our school based examinations. They have mastered skills in calculations in Mathematics, Principles of Grammar in both English and French, they have been equipped with modern knowledge in Science and ICT. We are double sure that our culture of imparting excellent knowledge and skills in our students is always maintained at our school.

EXTRA CURRICULAR ACTIVITIES

The school session saw our students experiencing more in the daily learning. We went an extra mile to take our students out to Liwonde National Park where they got out of class lessons about flora and fauna. We also involved our students in local sports to make sure that they maintain a sound health.

THE CAREER DAY AND GREEN DAY

Our students of the Foundation classes are one of the most active group at our school. We are aware of their keen learning senses. They had a Career day and Green Colour Day. During the Career Day they ushered their ambitions into the future to the lives they want and they are determined to pursue. On the Green day, they were taught to celebrate and preserve mother nature which is the life support of every living thing on the planet.

ACADEMIC ACHIEVEMENTS OF THE 2022/23 SESSION

Zomba Private Primary and Secondary school has evolved from being only a Cambridge Centre but has joined the international academic fraternity by administering its first IGCSE Examinations in the just ending session. It also has administered Year 9 Checkpoint Examinations making it a full scale Cambridge Centre. Our students have been prepared to challenge these international examinations and we have believed in their unwavering abilities to excel and succeed.

THE 2023 GRADUATION CEREMONY

The just ended Graduations for the Foundation Class and Year 6 marks a completion of hard work and it further marks celebrating the glorious years of Primary Education. We congratulate the graduates and wish them every success in their educational lives. May their futures shine and dazzle.

THE ANNUAL SPORTS DAY

It is cultural that every academic session ends in awarding excellence in every category at the school. We all witnessed medals, trophies and gifts to our stars in sport. We are aware of the role talent plays in one's life and at our school we make sure that talents are not suppressed. This academic year the annual sports winners are: Amir Asif (senior boys), Shania Mhango (senior girls), Pempho Khonyongwa (junior boys), Khaira Mussa (junior girls).

The 2022/23 school session at Zomba Private Primary and Secondary School has been another one, successful and worthy to be celebrated.
